2.79.0

Upcoming Change Details	
Version	2.79.0
Change Type	☐ *Breaking change* ☑ *Bug Fix* ☑ *New Feature* ☑ *Enhancement*

Change Details	*Fixes* • Orders page no longer shows duplicates when multiple search queries match the same order
	          • Fixed a bug which would not display Gantt chart when navigating to it from schedule page with expanded map
	          • Fixed a bug which would disable save button on depot creation / edit dialogue after toggling web hooks on and off
	          • Fixed a bug that would show event times in incorrect time zone
	          • Fixed a bug that would hide activities and map on some screen resolutions
	          • Scheduled / unscheduled tabs no longer change when selecting different trips on schedule page
	          • Map View in Schedules Page now expands correctly to full screen when triggered
	          • Fixed an issue which made the current van location to not always be displayed on Gantt chart
	          • Validation error on vehicle assignment dialogue now correctly disappears after vehicle that caused that validation error is unselected
	          • Fixed an issue which made van location creation requests fail on some occasions

		• Fixed a bug that prevented trips being created as a consequence of new vehicle exception in some cases • Fixed a bug that made some orders uncancellable and uneditable

	Features	• Core API extended with endpoints:
		  ◦ for getting locations of multiple vans
		  ◦ for getting statistics for multiple depots for a time range

	Enhancements	• After changing a page of any list, it is now automatically scrolled to the top • Order creation / edit dialogue now validates service time • Privacy policy and cookie consent buttons are no longer on top of one another • User edit dialogue allows seeing the password being changed • Improved property names (e. g. "order ID") in the event pop-ups on the map
